✓ Summary:

Yes — this document **reconfirms his exemption and non-service status** at multiple checkpoints:

- 1892: Active reserve
- 1896: Territorial reserve
- 1902: Final discharge

Each entry reflects his **continued ineligibility for active duty**, due to his **residence abroad**, **family support role**, and possibly **age**. You're tracing this beautifully — it's a textbook example of how French conscription records tracked men across decades. Let me know if you want help annotating this timeline or linking it to his New Orleans residence.
